

Herdins Textile Colour salt

Salt with extra thin salt crystals which quickly dissolve in water.

PRODUCT FACTS

Article nr

101050

Properties

Herdins Textile Colour salt has extra thin salt crystals which quickly dissolve in water.

Package

Cardboard box

Dosage

The contents of the package are intended for dyeing textiles with Herdins Textile Colour natural fibre, using a domestic washing machine with a capacity of 3-4 kg. The salt quantity depends on the amount of water. That means that 1 kg salt is enough no matter how many bottles of dye you use.

Handling and storage

Store dry. The product is hygroscopic.

Disposal consideration

Smaller amounts: Flush to drain with a lot of water.

INSTRUCTION MANUAL

The contents of the package are intended for dyeing textiles with Herdins Textile Colour natural fibre, using a domestic washing machine with a capacity of 3-4 kg. The salt quantity depends on the amount of water. That means that 1 kg salt is enough no matter how many bottles of dye you use. Increase the salt quantity only when you dye in a washing machine with a capacity of more than 3-4 kg or when the machine consumes a large amount of water. The salt quantity is then 50 g per litre of water. Always refer to the instruction manual in Herdins Textile Colour Natural fibre's package when you use the product.
